**Subject:** RE: Rationale for Missouri nutrient criteria for lakes

Jeff,

The only data that I can find that includes microcystins appears to be from your shop. It's not very extensive, and it mainly involves a few obscure lakes in the Kansas City area. I suspect that Graham and Jones never sent theirs to us. You may need to (pardon the phrase) pry it from them.

Thx Mark. I asked John H whether you guys had the actual data from the Graham Jones work (microcystins/chla). Have you been able to locate?
